

➔ Solar Gard® Info Sheet

FilmApp

The optimal liquid for the installation for architectural window film and Clearshield Pro

Key features

FilmApp is a mounting solution free from oil additives which simplifies the adhesive system to obtain optimal adhesion to glass and painted surfaces. Using FilmApp instead of the traditional detergent will let your installations to dry more evenly and help to avoid unwanted bubbles.

Benefits with FilmApp

- FilmApp works just like a traditional mounting solution. Just add a few drops FilmApp (2.5-5 ml) to 1 litre water and you get:
 - a cleaning solution that effectively cleans the surface where you will install the self-adhesive material.
 - a mounting solution that simplifies placing material in the exact position without it sticking/fixing to the glass.
- PH-neutral
- FilmApp is unlike traditional soap solutions as it has no oil components. Therefore, FilmApp is an optimal solution in areas such as dot matrix and other surfaces with printing on the glass where it can be difficult to get material to adhere and a white edge may occur.
- With FilmApp you can even avoid the "rainbow" effect that can occur (visible in direct sunlight), when oil additives dry in the glue over the surface.
